

*Robin's Dance Studio*

*Covid-19 Health & Safety Procedures*

*Updated August 2021*

The lobby is open, however we would prefer if dancers are dropped off and picked up at the door to limit the amount of people inside the studio. Exceptions will be made for dancers ages 3-5, but please try to only have one adult accompany the dancer inside.

Hand sanitizer is available outside and inside each dance room.

Touchable surfaces will be disinfected each day.

Please keep your dancer home if they show any signs of illness.

Please have your dancer wash their hands according to the CDC guidelines prior to coming to the studio and on every bathroom visit.

Dancers need to come dressed for class and bring their own labelled water bottles.

Dancers who are not vaccinated are always required to wear face masks in the studio and in class. Breaks will be given anytime they are needed in a safe space area. Exceptions include children ages 3-5 if they have trouble keeping their mask on. We ask that our vaccinated dancers be respectful of our younger dancers who are not yet able to be vaccinated and keep their masks on when in their presence both in the dance room and the lobby.

Staff will wear masks when instructing classes.

*Let's work together to be safe – for the love of Dance!*
